

NEIL PATRICK POTOT

Technical Lead / Mobile Solutions Architect | Senior Flutter Engineer

Philippines | neilpotot@gmail.com | linkedin.com/in/neil-patrick-potot

7+ YEARS

Mobile / Architecture

Professional Summary

Senior Mobile Engineer and hands-on Technical Lead with 7+ years of experience designing and delivering secure, scalable mobile and web platforms across fintech, enterprise, and consulting environments.

Positioned for a Technical Lead / Solutions Architect hybrid role: able to translate business requirements into technical direction, guide engineering standards, mentor developers, and collaborate across product, backend, QA, platform, and stakeholder teams.

TL / Architecture Fit

SOLUTION DESIGN

Product requirements into architecture, data flows, API integration points, release plans, and implementation paths.

TECHNICAL LEADERSHIP

Standards, decision review, mentorship, delivery planning, and engineering consistency.

SECURE DELIVERY

Authentication, MFA, JWT/OAuth, token handling, account protection, and recovery routing.

Core Stack

MOBILE

Flutter, Dart, Android Native, React Native, Expo, Method Channels

ARCHITECTURE

Clean Architecture, modular feature design, reusable component systems

BACKEND / QUALITY

REST APIs, Supabase, PostgreSQL, Edge Functions, RPCs, GitHub Actions, Playwright E2E

Product / Architecture Case Study

JobTracker CRM - Founder / Builder

Expo, React Native Web, TypeScript, Supabase, Edge Functions, GitHub Actions, AI Workflows

- Architected a full-stack alpha product across Expo web, Supabase Auth/Postgres/Storage, RLS, RPCs, Edge Functions, and AI service boundaries, keeping service-role and AI keys server-side.
- Designed the workflow from job lead capture to AI extraction, fit assessment, tailored document generation, application handoff, tracking, interviews, offers, and career evidence capture.
- Built a trusted-alpha delivery system with Playwright E2E coverage, cross-user RLS tests, authenticated CI, web export checks, VAPT/security notes, release gates, and deploy evidence.
- Public portfolio and live alpha are available; source walkthrough is available on request while the private repository undergoes public-readiness review.

Professional Experience

ASCENDION

Senior Flutter Developer | Dec 2024 - Present

- Led secure Flutter feature delivery for Maya account protection flows, integrating REST APIs, MFA, token-based authentication, and native method-channel communication.
- Designed profile-aware recovery routing across Clean Architecture layers, coordinating API data, domain rules, Cubit state, and user-facing recovery experiences.
- Delivered AFASA-aligned Time Guard locked-account experiences for transaction pause scenarios, recovery options, restriction banners, and XT states.

XAM CONSULTING

Senior Developer - Flutter | Mar 2023 - Sept 2024

- Built high-quality Flutter applications and reusable UI components for consulting clients and internal engineering teams.
- Supported architecture guidance, code review, quality practices, and maintainable Flutter implementation standards across application builds.
- Awarded Lead with Quality for implementing and sharing Flutter best practices.

Professional Experience - Continued

WHITE CLOAK TECHNOLOGIES, INC.

Engineering Manager & Senior Software Engineer | Dec 2021 - Mar 2023

- Led standardization of Flutter development practices across 8 engineering teams, improving consistency, scalability, and maintainability across projects.
- Proposed and implemented company-wide Clean Architecture and CI/CD standards for Flutter projects.
- Built internal CLI tools and reusable project templates that accelerated setup and improved engineering consistency.
- Mentored developers on Flutter architecture, code quality, delivery practices, and maintainable engineering workflows.

WHITE CLOAK TECHNOLOGIES, INC.

Journeyman Software Engineer & Android Developer | Jan 2021 - Dec 2021

- Served as de facto Team Lead and Deputy Scrum Master for the Bayad app project, supporting Agile delivery, sprint execution, and team coordination.
- Delivered Android and Flutter features while improving architecture, CI/CD pipelines, and TDD practices.

FFUF MANILA INC. / GDS LINK ASIA PHILIPPINES

Mobile / Android Developer | 2019 - 2021

- Developed and maintained enterprise Android applications including iMOW and STIHL using SOLID principles and maintainable mobile practices.
- Maintained enterprise Android applications, translated user feedback into product improvements, and supported issue resolution.

Selected Leadership Highlights

- Standardized Flutter engineering practices across multiple teams, including Clean Architecture, CI/CD gates, reusable templates, and internal CLI tooling.
- Hands-on leadership in regulated fintech product flows involving MFA, token-based authentication, account protection, restriction states, and recovery routing.
- Experience bridging implementation, quality, and stakeholder alignment through code review, mentorship, Agile delivery, and cross-functional collaboration.
- Built and operated a trusted-alpha full-stack product using React Native, Supabase, Edge Functions, TypeScript, Playwright, GitHub Actions, and AI-assisted workflows.

Best-Fit Roles

- Technical Lead
- Mobile Solutions Architect
- Lead Flutter Engineer
- Senior Mobile Engineer with architecture ownership

Honors & Education

HONORS Rockstar of the Year - Mobile, White Cloak Technologies | Lead with Quality Awardee, XAM Consulting | Trainer Awardee - Android

EDUCATION Technological Institute of the Philippines - Bachelor of Science in Information Technology | 2012 - 2019

PORTFOLIO GitHub portfolio and JobTracker case study: <https://nei1even.github.io> | Live alpha visible; source walkthrough available on request after public-readiness review.
